

Questionnaire
Regional Representatives for the Irish Sea Conservation Zone Stakeholder Group

Workshop SG feedback	Penrith
-----------------------------	----------------

Regional Representatives for the Regional Stakeholder Group

1 The role of regional representatives

Regional representatives need to be people who:

- Are trusted and respected within their sector or activity
- Have a good network of contacts within their sector, activity or interest
- Can explain the needs and interests of those they represent
- Can take a regional view
- Have the time and interest to participate in a lot of workshops and comment on draft documents or maps.

We currently think that there will be about 8 day-long workshops in the process set over the next 18 months. Each workshop will build on the work of the previous stage so the representative will need to commit to doing their best to attend the full set. At times, this may be one every other month and later workshops may need to run over two days.

The role of a regional representative on the Stakeholder Group is to:

- Have or develop a regional view of their sector or activity
- Represent the views of their activity or interest across the region
- Provide information and insight into the activity or interest
- Provide two-way communication between those they represent and the Stakeholder Group
- Negotiate over the optimum locations for the Marine Conservation Zones
- Comment on draft text, maps or other documents as they develop
- Do their best to attend all the workshops in the process

a. Tell us what you think of the description of the type of person and their role?

I am completely opposed	I have strong concerns	I could live with it	I support it	I strongly support it
			41

	23a	28	2/3	19
	17	21	?	7

What, if anything, would need to happen to increase your support?

Participant number	Event	
?	4	Expenses to travel to workshops as this will be an issue for some
7	4	Ensuring that project provides high level of communications support – to assist stakeholder ups – and <u>ensure</u> all s/h are included in comms.

Questionnaire
Regional Representatives for the Irish Sea Conservation Zone Stakeholder Group

10	4	The practical difficulty in attending stakeholder group meetings on a regular basis is that certainly in the summer fishermen will be at sea working. However it is important that the catch sector is represented on the group and some arrangement would need to be made for deputies to attend if the elected representative is unable to attend.
12	4	Representatives need to be open to others viewpoints and capable of working with others to achieve consensus.
15	4	Feedback to inactive public
17	4	Have explained the relevance of representatives
21	4	Difficult to get <u>Regional</u> representatives who have that level of knowledge. Could have Regional representatives who act as knowledge hub to engage area stakeholders.
22	4	They should have a background knowledge of marine environments / there should be at least 3 or 4 representatives with strong scientific knowledge of the marine environment & factors that influence it.
23b	4	Need excellent reference and track history
28	4	Ensuring that all relevant economic and social interests are represented, eg. Industry sectors including fishing, tourism and leisure, agriculture, nuclear, oil and gas etc and somehow (?) involving/representing local communities e.g. parish council?
29	4	All representatives <u>must commit</u> to achieving a consensus.
32	4	Ensure that representatives have relevant and acknowledged experiential background
34	4	Too much time commitment for volunteers that represent vital interests e.g. recreation/leisure
38	4	The time taken to attend work shopping and travelling particularly for the self employed or in private sector.

2 The process for selecting regional representatives

- The ISCZ has put together a long list of stakeholders comprising over 600 organisations.
- Invitations were sent out to them, to attend these workshops
- At the workshops, people are being asked to comment, via this questionnaire, on the composition of the Stakeholder Group.
- It is likely that more than one person or organisation will be suggested for some interests. When this happens the current plan is to contact the people on the list and ask them to confirm if they are able to take up the role if selected and also to short list names from the list. We, as independent facilitators, will review the short list looking for good geographic coverage particularly across the different user interests.
- National and international stakeholders are being identified and will be added to the Group
- The final list of people will be invited to the first Stakeholder Group workshop, which is planned for late this year or early next year.

b. Please let us know below what you think of this:

I am completely opposed	I have strong concerns	I could live with it	I support it	I strongly support it

What, if anything, would need to happen to increase your support?				

Participant number	Event	
?	4	Potentially balance the representation so that some non-environmentalists e.g. marketers are involved
7	4	May need a facilitated workshop for each sector to agree representation and how it would work?
10	4	Ensure that all interested parties are contacted and asked to participate in the 'election' process of stakeholder group representative
12	4	How will you select for a balance of stakeholder interest? Presumption that those attending workshops are sufficiently representative to begin with. Shortlist reviewed for "good geographic coverage". How will you select for "trusted and respected", "network of contacts", "can explain the needs of those they represent" etc.
15	4	Feedback to inactive public
17	4	To see that the relevance of the group is explained
22	4	Given the limited number of people on the panel it will be hard to get a geographic and interest-based mix of people on the panel. You are best to supplement this with site visits / road shows to also include views from a diverse range of public representation.

Questionnaire
Regional Representatives for the Irish Sea Conservation Zone Stakeholder Group

Participant number	Event	
28	4	As well as geographical coverage, there should also be a balance between public and private sector representatives and socio-economic practitioners/interests.
29	4	The invitees must commit to 100% attendance except in extreme circumstances therefore dates of workshops must be given well in advance to obtain commitment required.
32	4	Process should be made transparent by providing information on how decisions are arrived at.
36	4	If requested to be a regional representative I would do my best to attend workshops but this would have to fit other workloads. Remote consultation would not be a problem.
38	4	The regional representatives may need to set aside their own agenda and be a good communicator.

3 Structure of the regional part of the Stakeholder group

Please see the draft suggestions we (**dialogue matters**) have come up with.

This is very much just our best guess for now and we really need your views.

In compiling this list we have:

- Aimed to be inclusive and reflect the main marine interests in the region: marine industries, fisheries, recreation and environment.
- Identified some of the organisations we know of with relevant statutory responsibilities who have to have a seat on the Stakeholder Group – but we could have got this wrong so please check.
- Added in other interests whose perspective we think may be needed

The resulting list may look long, but with facilitated workshops, it is possible to include this number of people - and more because the national stakeholders have yet to be added.

We want your views so please use this form to consider:

1. If you can suggest names of people you would like to sit on the Stakeholder Group
2. If the structure seems reasonable and representative across all interests
3. If not, how it could be changed

- a. Please consider the list of potential members below. The list is aiming to include a wide range of regional marine users, interests and organisations. Please look at the list and insert people you would like to suggest. For any suggestions you make, please suggest how they can be contacted.**

	12	?	2/3	
What do you like about what you see?				

Questionnaire
Regional Representatives for the Irish Sea Conservation Zone Stakeholder Group

Participant number	Event	
?	4	Reasonable balance but see earlier comment about marketing.
2/3	4	There is a good balance between users and other individuals with interest in the conservation process within the Irish Sea
4	4	Wide range of interests
7	4	Combine 'Marine animals NGO' and 'Habitats NGO' through Wildlife Trust?
7	4	Broadly covers most of the stakeholder groups/sectors. Only way I can think of keeping the numbers down to manageable
10	4	Hopefully will have a good cross section of representatives who come to the table with an open mind
12	4	I note that environmental representatives are far out-weighted by socio-economic interests. I worry that the end result will try to keep everyone happy rather than holding to the objective which is marine <u>conservation</u> .
15	4	Inclusivity
16	4	South Lakes South Cumbria Rivers Trust – Ben Lamb Roa Island Boat Club Cumbria Tourism
19	4	Good mix of interests
22	4	There are some vital organisations missed (i.e. Natural History Society) that have environmental experts over a diverse range of natural issues (i.e. bird life, marine life, specialist experts etc) some of these people are now retired so would not be captured through the normal organisations.
23a	4	Broad Coverage
23b	4	Wide range of interests
24	4	Sectors are well covered
29	4	Potentially all interests would have a voice – if a representative for all sectors was found
32	4	Tries to be inclusive
34	4	Hard to answer this when we are not sure where this is going.
35	4	Good range of stakeholders
37	4	A good beginning
38	4	Balanced spread of interests and expertise
39	4	Broad Representation
40	4	Seems to be a spread between authorities/agencies, interest groups, users, businesses and scientific/protection/conservation.
41	4	The attempt to engage in honest dialogue with a wide range of intesters

What would need to happen for you to increase your support?

Participant number	Event	
?	4	Need to enthuse the group to keep it going given the size you have said you are aiming for. Our Wild Zone cluster group of stakeholders is only about 16, but we struggle to get attendance.
4	4	See point 34A – Harbour Masters often have large areas of interest (for navigational purposes) outside their harbour limits
7	4	Clarity of how national and international stakeholders fit into the process – needs to be mapped in, not imposed on.
10	4	Make sure that report back process is in place i.e. bulletins on progress to those not on stakeholder group

Questionnaire
Regional Representatives for the Irish Sea Conservation Zone Stakeholder Group

Participant number	Event	
12	4	I hope that the National Ecological guidelines will reassure me that environmental issues will remain the primary concern, regardless of the ability of stakeholders with other interests to club together to vote against the best conservation options.
15	4	Feedback to inactive public
17	4	Where does the money come from? (other than the poor ol' tax payer!) i.e. who thinks its worth while enough to pay for it?
19	4	The actual people make the difference, but we can't control that
22	4	If you contacted the Natural History Society and asked them to put out feelers for experts in marine life habitats, wetlands and seabirds, similarly get in touch with the RSPB and other volunteer organisations (including recreational sea users i.e. rowing (surfing clubs). You also need to include more independent scientific experts – these would best assist the knowledge you require to make your plans robust.
23a	4	Those who stand to be most impacted by designations should be weighted appropriately.
23b	4	Regular updates
24	4	Halve the representation for each sector
28	4	Too heavily public sector biased – need to see more voice for private sector and local communities. Need for more local knowledge/esperience – feels too “top-down”.
29	4	Understanding of equality of sectors viewpoints – ‘professional’ representation the ability of representatives to understand the ultimate goal and consensus needs to be reached – for the benefit of all Irish Sea users and the communities on its periphery.
31	4	You seem to have all areas covered
32	4	Integrate members with knowledge of the interface between marine and freshwater environment.
34	4	Take less time involving delegates – more focus from staff – less
35	4	General comment: need to tailor engagement specific to the stakeholder!
37	4	Too much proposed duplication of representation. Avoid duplication of influence which will create power blocks – potential power blocks: government agency, civil servants, local governments – to allow a more representative selection of stakeholders.
37	4	Keep communicating.
38	4	For the outcome to be clear.
41	4	I fear that the demands of people will prevail over the conservation of our already threatened wildlife, ultimately to the general detriment of wider society.

c. If you want to add different activities or organisations, please say what you would add and which you would remove to make room for it, and why.

Participants number	Event	I would add	I would remove	Because ...
?	4	Tourist Boards e.g. CTB		The coastline is a tourism asset
?	4	Marketing experts – cluster group experience		
7	4	Scalloping interests		Significant sector to be considered

Questionnaire
Regional Representatives for the Irish Sea Conservation Zone Stakeholder Group

Participants number	Event	I would add	I would remove	Because ...
13	4	NFFO		Knowledge of Fishing Industry
22	4	Natural History Society		They comprise of a number of experts involved in a number of fields, most with much experience and possess the scientific knowledge too.
22	4	RSPB		They comprise of a number of experts in Birdlife and would help provide the scientific knowledge to carry the project through.
22	4			You may not need to remove anyone. More so combine groups (i.e. NW Regional Development Agency 4NW & Government office NW into one representative). This could be done with groups that work very closely with each other. Similarly the RSPB and Natural History Society listed above may be able to be combined as some of the members overlap.
32	4	Marine Biologists		
34	4	RYA		Very involved in Education regarding navigation and safety
36	4		The Leisure and tourism section	
36	4	Council for British Archaeology		Possible historic environment stakeholders
36	4	National Trust (Jamie.hunt@nationaltrust...)		Possible historic environment stakeholders
37	4		Industries (the energy sector – renewables, energy sector – oil and gas, sand and gravel extraction, sub sea cables, small scale marine industries) are all identifiable the “abusers” eg.	Detrimental to habitats, therefore fractional representation only.
37	4		Shipping and ports and harbours	Should have observer status only?
37	4		Shared representative between marine and fisheries agency or sea fisheries	Duplication

Questionnaire
Regional Representatives for the Irish Sea Conservation Zone Stakeholder Group

Participants number	Event	I would add	I would remove	Because ...
37	4		Shared representative between JNCC, Natural England, and Environment Agency	Duplication. Therefore let them nominate a joint representative
37	4		Shared representative between Habitats NGO, Birds NGO, Marine animals NGO	Some overlap? Shared expertise? Fractional representation. Duplication
37	4		Tourism and recreation	Observer Status Only
37	4		Shared representative between recreational (inshore craft) and yachts and cruisers	
37	4	Haaf netters		Have been around for 1200years
37	4	Wildfowlers?		What about them?
37	4		Shared representative between English Heritage, Coastal Heritage	Shared representative
37	4		Marine Archaeology	Not needed?
37	4		Shared representative between Crown Estate, MOD, NW Regional Development Agency, Government Office North West	Duplication of representation. Government is already well represented.
37	4	Education and Marine Scientist		As employees and advisers
37	4		Cheshire Council	
37	4		Liverpool City Council	Up a river does not count
41	4	Cumbria Wildlife Trust		As a shared representative for Habitats NGO and Birds NGO
